The Ikastola Begoñazpi, in the Txurdinaga neighborhood of Bilbao, has reduced its carbon footprint due to its commitment to the environment. There is still a lot to be done, but the effort to do things better, both in its facilities and in its educational programs, show the first results of improvement. The Ikastola has once again counted on Naider to carry out the Carbon Footprint of the center. In this 2019 report we have updated the previous report and we have calculated the emissions of Begoñazpi in the years 2017 and 2018. The consumption of energy and electricity is going down. Now it is time to focus on transportation, as this report concludes. A challenge that Begoñazpi Ikastola surely knows and wants to face!
