NAIDER and STRATA have submitted a joint proposal for the provision of scientific-technical and economic evaluation services for entrepreneurship projects based on technological assets within the framework of the Basque Tek Ventures initiative imposed by SPRI - Basque Business Development Agency and aimed at the creation of high-impact business projects based on the technology generated by the R&D agents of the Basque Science, Technology and Innovation Network.

STRATA, a company specialising in the evaluation of technological assets and in accompanying innovative start-ups in a dozen countries, is a regular collaborator of NAIDER in the field of innovation and has an international team of experts in science-technology-market, technology transfer and technological entrepreneurship.
