

ESTIMATE OF THE R&D INDICATOR IN THE BASQUE AUTONOMOUS COMMUNITY

Posted on 15/03/2023 by Naider

Naider collaborates with the Basque Innovation Agency in the calculation of the global R&D expenditure made by Basque agents in the financial year 2022 and its estimation for the current financial year 2023.

Estimating R&D investment in advance helps to guide the region's innovation policies and to bridge the gap between public statistics over several years. The methodology used is based on a model developed and updated annually by Naider, the results of which incorporate the perception of the country's major R&D agents.
