

PROJECT FOR THE ACTIVATION AND REGENERATION OF THE ARPILLAO AREA IN PLENTZIA

Posted on 19/05/2025 by Naider

[Plentzia Town Council](#) has launched a project in collaboration with the [PiE](#) Marine Station to identify opportunities for the strategic regeneration of the Arpillao area.

Located a few metres from Plentzia beach, the Arpillao area is home to a car park that is currently out of use due to structural deterioration. With the support of Naider, this project offers an opportunity to develop a comprehensive regeneration strategy that goes beyond structural repairs, allowing the entire area to be revitalised in a sustainable manner that aligns with local and regional needs.

This strategy will be a vital tool for guiding future interventions in Arpillao, ensuring a transformation that is coherent with Plentzia's urban development aspirations.
