

ARTIFICIAL INTELLIGENCE FOR INNOVATION MANAGEMENT PROJECT

Posted on 02/11/2023 by Naider

The Basque Innovation Agency Innobasque will count on the technical secretariat service of Naider for the implementation and coordination of a collaborative project between several agents for the incorporation of artificial intelligence in the study and monitoring of R&D&I in the Basque Autonomous Community.

The aim is to align academic capacities, business expertise in AI and knowledge in the field of Science, Technology and Innovation management. The idea is to take advantage of the new opportunities that artificial AI can provide when it comes to establishing patterns of innovative Basque companies that make it possible to know and estimate the universe of innovative companies in each financial year.
