

TECHNICAL DEFENSE IN THE TRUCK CARTEL CASE

Posted on 03/02/2025 by Alex Atxa

Since 2017, Naider has supported numerous clients in a key process to defend their interests against the so-called Truck Cartel.

Our work is based on the preparation and drafting of expert reports that estimate the damages suffered by the affected parties. In total, more than 230 reports have been produced, covering over 770 trucks, ensuring a rigorous and solid analysis to support claims.

The work is not limited to written reports: Naider provides continuous technical assistance in hearings and negotiation forums, reliably defending the methodology and conclusions of the expert reports. This support proves decisive in strengthening clients' positions in complex and lengthy litigation.

The results of the service highlight the ability to combine rigorous economic analysis with technical support in highly demanding legal contexts.
