

BASQUE INDUSTRY 4.0 SHOWS ITS DEVELOPMENT

Posted on 19/05/2016 by Naider

Basque industry wants to be Industry 4.0. In a conference organized by the [SPRI](#) yesterday, May 18, at the [Miñano Technology Park](#), a conference attended by [Naider](#), 24 Basque companies were able to show their success stories in the [development of Industry 4.0 solutions](#).

Throughout the value chain, companies showed, among other applications, virtual recreations of machinery for training and

personnel selection through gamification, the use of augmented reality to follow instructions through a tablet , or the use of sensors to improve the ergonomics of factory operators. They also talked about solutions to reduce the development cycle of a product in time to days or hours, the treatment of massive data or Big Data to optimize the production process, or tools that allow personalized treatment to customers.< /h3>

The event had already been presented before SPRI itself, before the Spanish Association of Machine-Tool Manufacturers at the IMH in Elgoibar, and at the Zamudio Technology Park, and there will be a new opportunity to learn about the cases tomorrow, Friday 20 May at [Miramon Technology Park](#).
