

BICYCLES ARE FOR SUMMER

Posted on 11/08/2014 by Naider

Orbea has launched the Orbea triathlon platform, made up of the Ordu Race and Ordu Evolution models.

Thanks to research carried out by Orbea, the Ordu Race model features a top-of-the-range monocoque carbon frame with an aerodynamic and ergonomic design; on the other hand the Evolution model has become an aerodynamic bike thanks to the work done on the [North Carolina A2 Wind Tunnel](#), exceptional stiffness, a 4-size stack and reach design, and a 100% carbon monocoque frame life.

These new technology-based models have already passed their first litmus test, with the Ordu Race model being the fastest bike ever in the latest edition of the test [Ironman](#).
