

BUILD A CAR IN TWO DAYS

Posted on 02/03/2015 by Naider

Going to the dealership, ordering a car to your liking and having it ready in a few days is already possible. [Local Motors](#), was able to build a car in 4 days. With just 49 parts compared to 5,000 or 6,000 for conventional cars, [The Strati](#) is how this vehicle of the future has been sponsored.

Local Motor launched a campaign for the design and production of the vehicle which won [Michele Anoe](#). [The product was presented at the International Manufacturing Technology Exhibition \(IMTS\) and is capable of reaching 60 km/h and has an endurance of 200 km on a single charge. Obviously, it still has many limitations for daily life, but it is a ray of hope to see something tangible and that progress is present. In fact, those in charge of the project assured that it would be possible to do it in two days.](#)
