

MORE PROMISE FROM SCIENTIFIC RESEARCH

Posted on 15/07/2014 by Naider

RESEARCH FELLOW 2014 RESULTS

For the third year in a row, [Ikerbasque](#), has announced the results of the Research Fellows Call in which 25 promising young people have been selected, from among 468 applications, who will work in the Basque Country over the next five years.

The lines of research that they will cover are varied, so 36% of the people selected will work in Medical and Life Sciences, the same in Experimental Sciences, 16% in Social Sciences and Humanities and 12% in Engineering and Technical Sciences.

A great boost to science and technology in our territory, especially at this time when the crisis and budget cuts in this area are a reality.
