TEXTBOOKS OF THE FUTURE

Posted on 09/02/2015 by Naider

There is no excuse anymore, the interactive geology book is here Earth for iOS that will make the old and boring books go to the storage room. Visually, interactively and aesthetically impressive, this is how these books are expected to be, which will surely attract the attention of children, or at least more than the current ones.

An introductory basic manual is already available in the iOS App Store for $10. Society advances at the pace of technology and we hope it is on the right track.
