

THE IDEA OF THE CITY IN YOUR HAND

Posted on 26/10/2015 by Naider

Badajoz will host the [startup4cities project](#) in its second edition by *Spanish Networks* and *Portuguese*, this contest was created with the aim of promoting technology-based entrepreneurship in cities to meet modern needs and times, from improving energy efficiency to urban mobility .

A group of experts in new technologies will be in charge of choosing the best projects that, as a prize, will obtain the opportunity to present a new phase to representatives of various locations, in addition to these, managers from different companies and incubators will also attend.

The final event, on November 17, will be held in Barcelona and the city councils that so wish will be able to choose the projects that best suit their tastes and needs, a good way to promote entrepreneurship and participation among citizens.
