

THE LOCAL PRODUCT CATALOG "DONOSTIA KM0", AVAILABLE TO THE PUBLIC

Posted on 20/03/2019 by Naider

The "Donostia KM0" Catalog of the Guztiona Agrifood Cluster, the result of NAIDER's collaboration with [Fomento de San Sebastián](#), is [available to the public](#) since its presentation at the beginning of this month of March at the Donostia City Council. The document has a double objective: to inform citizens of the local product available in their environment and, in addition, to serve as a tool in the marketing processes. To do this, the catalog highlights the differential value of the product of the closest professionals.

In this edition of the "Donostia KM0" Catalog, the local product of 22 producers from Donostia and its surroundings is brought together, and it is possible that there will be new additions in the future. The catalog is available to the public in PDF format at [this link](#).
