

R&D INVESTMENT VARIATION

Posted on 27/08/2019 by Naider

The [2019 Report of the COTEC Foundation](#) highlights that Spain has lost its way in innovation compared to Europe, with Spain, Finland and Portugal being the only states that have not recovered the levels of investment in R&D prior to the crisis. At the same time, the increase in investment in R&D in Europe (22% between 2009 and 2017) pales before the Chinese takeoff (99% increase between 2009 and 2015) .

According to [OECD data](#), Spain stands out among developed

countries for less support from the private sector for R&D.
