

# THE GLOBAL CITIES WITH THE MOST WOODED AREA

*Posted on 04/03/2019 by Naider*

To make the world's cities greener, and to make urban planning more accessible to the public, MIT and the World Economic Forum created [Treepedia](#), [an interactive map web tool that shows the tree density of the main cities of the world. The researchers use the aerial imagery available on Google Street View to determine which cities have the highest percentage of forested area.](#)
