

GUIDE TO TAX RELIEF FOR HOUSING AND BUILDING RENOVATIONS

Posted on 23/02/2024 by Naider

More than half of the state's residential buildings date from before 1980, i.e. before the first regulations establishing minimum energy efficiency criteria came into force. The subsidies available through the European Next Generation funds are an opportunity for the renovation of houses and buildings.

The "[Guía de sobre desgravaciones fiscales para la rehabilitación de viviendas y edificios](#)", a publication promoted by the Consejo General de Economistas and the Consejo Superior de los Colegios de Arquitectos de España, contains updated information on taxation and existing rebates for renovation actions and their financial aid, as well as examples of numerous examples of practical application.
