

# EUROPEAN ENVIRONMENT AGENCY'S TRENDS AND PROJECTIONS REPORT 2023

*Posted on 12/01/2024 by Naider*

The [European Environment Agency's Trends and Projections Report 2023](#) explores historical trends, recent developments and projected future progress in mitigating climate change by reducing GHG emissions, increasing renewable energy and improving energy efficiency. It is based on data reported by the 27 member states of the European Union, as well as five member countries of the European Economic Area and nine Energy Community Contracting Parties.
