Our friend Guillermo Cruz, exceptional director and committed person where he finds them, has just released his documentary EuroEstafa. An energetic and forceful review of the causes of the unparalleled crisis that Spain has suffered and is suffering.

We may disagree on some issues or miss other ways of understanding what happened, but that does not detract one iota of seriousness and strength from a great job of analysis magnificently conducted.

Congratulations above all for what it means of determination to provide an uncomfortable, risky and ideologically charged story in these times in which banality continues to prevail.
