Ibon Linazisoro (Ekoiru) and Óscar Royuela
(Logistics Institute).

The [Basque Institute of Logistics](#) and Sustainable Mobility-Mugikortasun Iraunkorra ta Logistikako Euskal Erakundea (IVL-LEE) has subscribed with [Ekoiru Consulting](#) its adhesion to 'Conpy Basque', a platform that has more of about twenty Basque companies committed to the project "Euskadi on the way to the smart city / Euskadi Hiri Adimendunerako Bidea".

This consortium will develop its activity in the environment of the 'Smart Cities' and its main objective is to offer municipalities and companies comprehensive solutions to achieve intelligent, efficient and sustainable management. 'Conpy Basque' will act in areas related to energy efficiency, sustainable mobility, energy saving, transparency in public management (open government), waste control, renewable energy and all those additional activities linked to the aforementioned objectives cited. The methodology applied by the consortium in the development of its tasks is based on the use of the specialties of its members.
