

VIDEO: CLIMATE CHANGE IN DONOSTIA

Posted on 11/03/2019 by Naider

According to [recently released NASA data](#), the last five years of the five warmest years on record, and 18 of the 19 warmest years have occurred after 2001. On the occasion of the *Change the Change* International Conference on Climate Change held in Donostia -San Sebastián between March 6 and 8, RTVE's meteorological services released a video showing the potential effects of global warming on our coasts, if we do not act immediately.
