NAIDER 2023/2: "DECARBONISATION, A SOCIAL IMPERATIVE"

Posted on 16/10/2023 by Naider

In our autumn publication we address the opportunities for regeneration of urban and industrial environments and share some solutions that we are working on at NAIDER from the local and territorial level. Here are the contents of this issue:

Editorial

Decarbonisation, a social imperative

Analysis

- Tools to boost circularity and decarbonisation in multi-sector industrial SMEs
- Tools for the decarbonisation of cities and the recovery of civic public space
- Tools for the establishment of a Sustainable Urban Food System

Keys to Transition

- The challenges of economic transformation at the local level
- Socio-economic impact analysis of Low Emission Zones, a cornerstone of good regulation
- Accessibility in cities, a challenge of the present and the future
- Dismantling Living Labs
- Body-Territory: A Participatory Experience of Socio-environmental and Urban-Territorial Diagnosis in Buenos Aires
- Open innovation in the public sector
- Digital tools in the urban transition
- European Waste Law: A new step on the path to a circular economy
- The Country Brand and the need to strengthen basic consensuses
- Big Data Analytics, the fine line between success and failure

Current affairs

- District V21, innovation district in Valparaíso
- Edulab, co-creating and sharing innovation projects in the classroom

- The Basque Energy Transition and Climate Change Law, in draft form
- The proposed European law on sustainability in textiles and food waste

Projects

- Urban Klima Impact
- Gumuzio Garapen Zentroa
- SCORE Project Operational Plan
- Fair Trade Evaluation
- Provincial Entities' Energy Diagnosis
- General Energy Action Plan
- DEK Azterketa
- Artificial Intelligence

Documents

- Global Trends in Public Sector Innovation
- The biodiversity benefits of a strong circular economy
- The 10 emerging technologies of 2023
- Investing in nature-based solutions
- Study of the Economic Impact of the Spanish Public University System (SUPE)
- Recommendations for starting a local energy community

And all the latest news about the Naider Project month by month in our news library.
