

NAIDER 2025/2: "ACTION FOR CHANGE: COLLABORATION AND EQUITY"

Posted on 14/04/2025 by Naider

In our spring publication, we set out approaches to guide action in this changing environment, based on collaboration and equity. To contribute to the conversation about the decisions ahead of us, we present analyses of territorial innovation ecosystems, urban regeneration, talent policies and other important issues for identifying opportunities and developing robust strategies that balance competitiveness, sustainability and well-being. This collection of analyses, reflections and documentation is complemented by a review of all the projects and initiatives we worked on during the first quarter of 2025.
