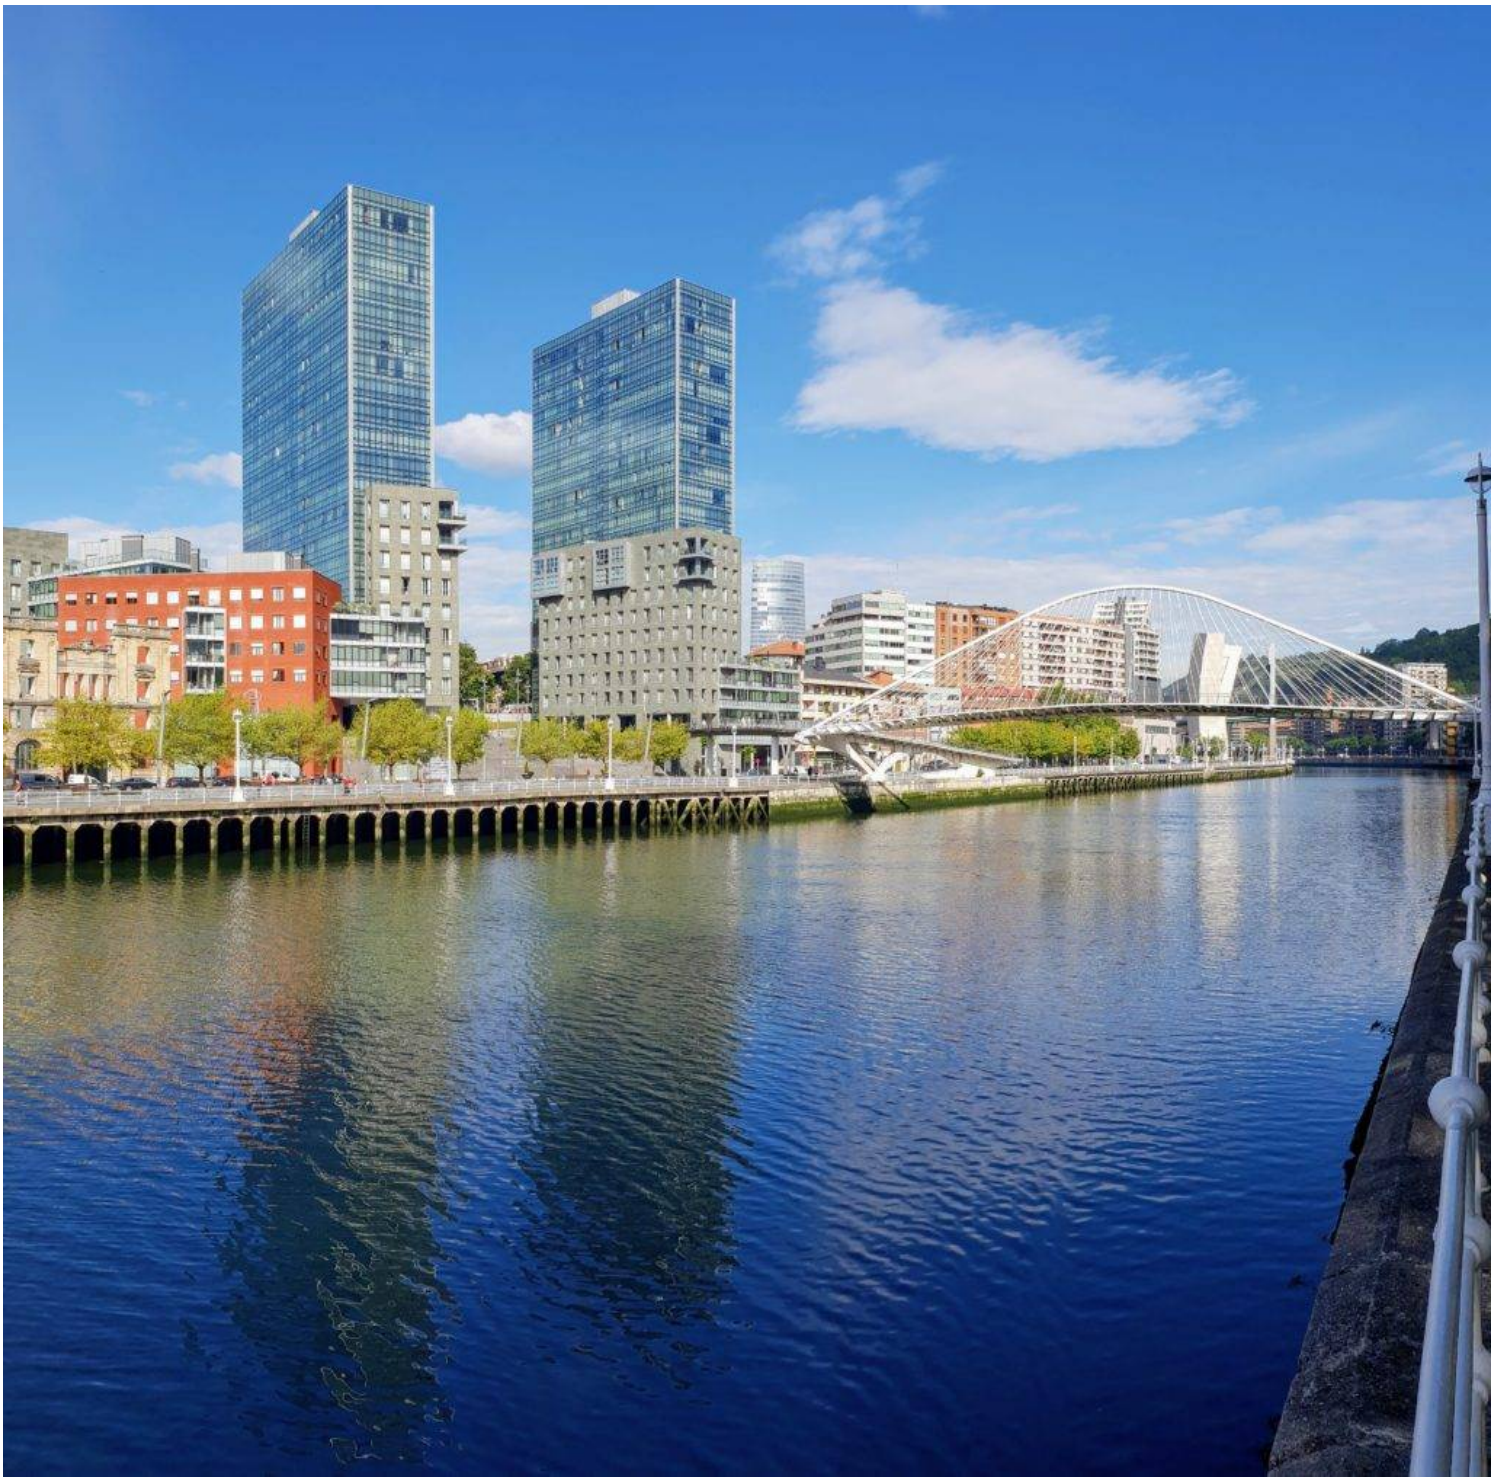
BILBAO 2050 ENVIRONMENTAL STRATEGY

Posted on 23/07/2019 by Naider

Category: News



Naider has obtained the highest rating in the proposal to accompany the Bilbao City Council in the follow-up and monitoring of its environmental strategy for the city. The project will be developed over the next three years and will allow the generation of qualitative, quantitative and geospatial information on the degree of progress of the city in its three reference axes in the matter: CO2 Neutrality, Resilience and Health.

We are very happy with the award. It is quite a responsibility

to be able to support the main council of the Basque Country in its transition towards a fully sustainable city and committed to the Environment. Together we will do a great job. At the height of this great city.
