

BUILDING THE CITY NAIDER

Posted on 07/10/2015 by Naider

Category: [News](#)

From naider we have been working for years to create sustainable, inclusive, economically viable and technologically advanced cities, because we believe that cities should not be the "layman" of the councilors on duty, that is why we ask you for help. We ask for your help to give us, according to your point of view, the main characteristics that a city should have, we ask for your help to help us complete the table. We ask you for help so that together we can all build the city naider.
