Oarsoaldea Garapen Agentzia, with the technical assistance of NAIDER, has successfully delivered its training programme on ecological and energy transition aimed at the technical and political staff of the municipalities in the region.

Across two training sessions held in September and October, the programme provided an opportunity to reflect on the challenges posed by energy and environmental sustainability in local government, to learn about new regulatory obligations, and to practise tools applicable to daily municipal work, such as Green Public Procurement.

The participation of municipal staff and the agency itself made it possible to share experiences and strengthen capacities to move forward in a coordinated way towards a just and sustainable transition in Oarsoaldea.

With this initiative, Oarsoaldea reaffirms its commitment to sustainability and to promoting local public policies aligned with the territory's climate and energy objectives.
