Next Sunday, December 19, our colleagues Aitor Mingo and Sara Soloaga will participate with a talk on Urbanism and Sustainability in the event that EH Bioeraikitzen will organize throughout the weekend in Bilbao. During Saturday and Sunday, two domes will be set up in the Doña Casilda park in Bilbao to publicize and promote bioconstruction and, likewise, invite citizens to reflect on the current urban planning model through the assembly of structures geodesics and the workshops and talks that will be organized inside.
