Last February 23rd and 24th, NAIDER participated in the second SCORE project workshop with Oarsoaldea Garapen Agentzia. Together with our project partners IHS Institute for Housing and Urban Development Studies, ERINN Innovation and RED Risk Engineering + Development, numerous activities were carried out during two days with the CCLL of Oarsoaldea and several relevant local agents based on the co-design and co-creation of solutions.

The objective of the workshop was to identify and prioritise a series of EBAs (Ecosystem Based Approach) based on the score given by the participants to the parameters or evaluation criteria previously chosen by them. The participants also worked on the development of a strategy for financial resilience in the face of possible future climate risks. The two days of intense work and knowledge exchange led to very valuable results.
