NAIDER assists the Provincial Council of Bizkaia in the preparation of the Specific Energy Action Plan for the Bizkaia Provincial Council's Vehicle Fleet Section 2024-2030. Following on from the work carried out with the Provincial Council's General Energy Action Plan 2023-2030 and the definition of the Energy Action Units, the specific plan for each Action Unit is to be drawn up.

This work will provide the evolution of energy savings of the fleet from 2016 to 2022, which will serve as a basis for setting the target percentage of savings in 2030 for this unit with respect to the General Plan.
