[Debegesa](#), the regional development agency of Debarrena, is being supported by NAIDER in the identification and development of strategic business projects for the [Basque Precision Technology District](#) (BPTD).

The BPTD, promoted by Debegesa, aims to strengthen the industrial ecosystem of Debarrena and the surrounding areas by focusing on precision technologies. The public-private partnership of the BPTD includes the leading companies in this field in the area, as well as the technology centres of Debarrena ([Ideko](#) and [Tekniker](#)), the vocational training centres of the region and the University of the Basque Country.

The aim of this collaboration is to bring to the surface initiatives strategically aligned with the BPTD and capable of promoting innovation, competitiveness and sustainable development in the Debarrena area.
