The Vitoria-Gasteiz Industry Board held a plenary meeting today, 16th April, to discuss the progress of the Industry Support Plan, the main instrument for strengthening the competitiveness of Vitoria-Gasteiz as an industrial city, with those in charge of the city council.

The Department of Economic Promotion, Employment, Trade and Tourism hosted the meeting with the presence of the councillor, María Nanclares, the director of the department, Maite de Juan, and the head of the business service, Juncal Ibeas.

In this context, Naider has had the opportunity to stimulate a dialogue on the relevance of the different actions implemented throughout the Plan.

The Industry Round Table brings together the business associations and companies representing the different industrial areas of the municipality with the Vitoria-Gasteiz City Council to gather their demands and concerns and reach a consensus on actions. It meets in plenary session twice a year and maintains open channels of participation among its member agents.
