The Provincial Council of Bizkaia has held two technical seminars, one in Basque language and the other in Spanish, together with NAIDER, in order to transfer knowledge to the council staff on energy saving and efficiency measures and renewable energies, in an attempt to reduce energy consumption, learn about the requirements of current legislation and seek new sustainable energy solutions.

More than 30 workers from different departments of the Provincial Council, including those responsible for Maintenance, technicians from the Department of Sustainability and Natural Environment or from the Department of Infrastructures and Territorial Development, took part in these workshops.
