Yesterday, 8th November, the transversal training courses on techniques to increase energy saving and efficiency, addressed to the staff of the Provincial Council of Bizkaia, were completed, given by Naider in Basque and Spanish, by the hand of the Environmental Quality Service.

The technical sessions of the third of the three blocks focused on the path towards emission-free and resilient transport, with the participation of council employees working in departments related to mobility.

[In the previous blocks](#) we shared knowledge on energy management in the public sector, and energy saving and efficiency measures in public buildings.
