Naider has collaborated with the [Energy Agency of the Basque Government \(EVE\)](#) in the revision of the socio-political diagnosis of the Basque Country within the framework of the [European INTERREG SIRENERGY project](#).

This diagnosis aims to identify and analyse the external factors that influence the present and future development of renewable energy projects in rural areas in the Basque Country. The SIRENERGY project, in which EVE participates, aims to develop initiatives that contribute to improving the social acceptance of renewable energy projects through, for example, citizen participation and the socialisation of the corresponding initiatives.
