The people who build the NAIDER project met yesterday December 22 in Bilbao for our 2022 closing day, an opportunity to share and assess the impact of our daily work, the challenges we have faced, and the achievements and lessons learned this year, internally, and in the cities and territories where we intervene hand in hand with our partners and clients.

All this allowed us to open a joint reflection process for 2023, in order to continue building the NAIDER project and to continue contributing value to society as a whole in processes of ecological transition, business competitiveness and territorial development.

On these special dates we could not miss the space for the celebration, which we hope will be extended to everyone.

Happy Holidays to all!
