Naider has the pleasure of collaborating with Fomento de San Sebastián in the organization of the Local Product Day, an event that, after a year in virtual format, returned in person to the Boulevard of San Sebastián on November 5 and 6, with good atmosphere and participation.

However, after the successful experience of 2020, the virtual market also returns this year with more days of availability: the virtual store will be accessible at the link dssmarketplaza.eus from 9 to 13 November.

As a novelty in 2021, the Day of the Local Product was also celebrated on October 16 in the Altza neighborhood, also with the participation of Naider. The Local Product Day, in conjunction with the awarding of the Commitment to Local Product awards, aims to value the local agri-food sector.
