NAIDER has taken part in a new gathering of the **New European Bauhaus (NEB) community in the Basque Country**, held at the headquarters of EDE Fundazioa. The event brought together representatives of the **NEB partners in the Basque Country** to share progress, exchange experiences and identify new opportunities for collaboration.

As a New European Bauhaus partner, NAIDER is part of a European community bringing together sustainability, inclusion and quality of the built environment. Our participation allows us to connect NAIDER's experience in **urban and territorial transformation, ecological transition and innovation** with new initiatives, projects and collaborations developed within the NEB framework.

The gathering helped further strengthen the Basque New European Bauhaus community and connect capabilities, perspectives and experience around future projects and collaboration spaces.

The gathering was also attended by Bilbao Metropoli 30, BBK Kuna, Calasanz Santurtzi, eCivis, Cluster Gaia, Conexiones Improbables, TABAKALERA and The Languages of Energies, alongside NAIDER.

The event took place at the recently refurbished headquarters of **EDE Fundazioa**, a space closely aligned with the values and principles promoted by the New European Bauhaus.
