

# PREPARATION OF THE EUSKADI ECOLOGICAL FOOTPRINT 2019

*Posted on 17/04/2019 by Naider*

Category: [News](#)

Naider will carry out the **calculation of the Euskadi Ecological Footprint 2019**, after **winning the public tender** Presented by the **Public Environmental Management**

**Society of the Basque Government, Ihobe, S.A.** The objective is based on analyzing the evolution of the ecological footprint of the Basque Country and comparing it with that of other similar regions in the European context. The ecological footprint shows the degree of sustainability of the consumption habits of the Basque population in relation to the availability of natural territory on the planet; that is, it determines how much nature each Basque inhabitant is using to maintain their standard of living.
