BASQUE PUBLIC POLICY EVALUATION SYSTEM

NAIDER has submitted a proposal to the Basque Government's Directorate for Open Government and Good Governance to design, test and consolidate the **Basque Public Policy Evaluation System**. It is a common framework for regional, provincial and local institutions to evaluate their policies in a consistent way, be accountable and use evidence when making decisions.

The Basque Country already evaluates, and does so in many fields at once: the Basque Government's 2012 Public Policy Evaluation Guide, the evaluation of employment and inclusion policies, the provincial regulations of the three Provincial Councils and the public monitoring of term-of-office plans. The assignment responds to the 2024-2028 Government Programme, the 3rd OGP Euskadi Action Plan 2025-2028 and the Basque Transparency Act 3/2026, and aims to bring these pieces together into a system that is useful for decision-making.

The proposal sets out a practical system adapted to each institution, designed so that Basque administrations can make it their own and use it in their day-to-day work.

With this proposal, NAIDER brings its experience in public policy evaluation, indicator systems and the monitoring of strategic plans for Basque public administrations.
