This morning the UDAL FOROA was held in Ortuella in the framework of the 2030 School Agenda. Some thirty schoolchildren from the three schools in the municipality, Otxartaga IES Ortuella BHI and San Félix Ikastola, presented the work carried out during the school year to the Mayor. They explained how they have fulfilled the objectives acquired in the school Agenda 2030 and how they have worked to improve the environment. From improving recycling in schools, to planting trees in the municipality, to strengthening the relationship with teachers through sport.

They also explained how they have worked together for two years to improve the situation in the whole municipality in relation to SDG 3 on health and wellbeing.

Throughout this two-year process, NAIDER has been collaborating with Ortuella Town Council to implement the 2030 School Agenda.

We have bid farewell to the long school year with a healthy snack, in line with what we have learned during the course.
