The people who build the NAIDER project met on 20 December in Bilbao for our 2023 closing day, an opportunity to share and assess the impact of our daily work, the challenges we have faced, and the achievements and lessons learned this year, both internally and in the cities and territories in which we work with our partners and clients.

All of this allowed us to open a process of joint reflection with a view to 2024, to continue building the NAIDER project and to continue contributing value to society as a whole in local and territorial development processes.

On these special dates, there could not be a lack of space for celebration, which we hope will be extended to everyone.

Happy holidays!
