[SODENA](#) has approved NAIDER to provide technical support services for the development of strategic sectors and value chains in Navarre.

This approval enables NAIDER to deliver sector analysis and value chain mapping, identify trends and business challenges, develop action plans and roadmaps, and provide technical assistance in initiatives aimed at competitiveness, diversification, innovation, internationalisation and sustainability.

Through its Dynamic Purchasing System, SODENA structures collaboration with entities demonstrating proven solvency in order to strengthen both priority sectors and emerging areas within the Chartered Community of Navarre, fostering the transformation and growth of the regional economic fabric. This approval complements NAIDER's previous admission in the field of regional strategy.
