Naider has collaborated with Ihobe on the development of the **Environmental Outlook Viewer of the Basque Country 2024**, an online tool that compiles and presents the main environmental indicators of the region. [Available on Ihobe's website](#), the viewer provides clear and accessible information on the evolution of environmental quality in the Basque Country, covering key areas such as energy, climate change, circular economy, biodiversity, and air and water quality.

The tool is designed to offer an up-to-date picture of the environmental situation of the territory and to make it easier to understand the progress and challenges in sustainability. Through interactive graphics and an intuitive design, the viewer helps identify trends and strengthens decision-making at both institutional and societal levels.

With this collaboration, Naider reinforces its commitment to environmental knowledge and dissemination, contributing its technical expertise to bring data closer to citizens and support a more sustainable Basque Country.
