

MATRIMONIO DE APPLE E IBM

Posted on 18/07/2014 by Naider

Welcome, IBM. Seriously.

Welcome to the most exciting and important marketplace since the computer revolution began 35 years ago.

And congratulations on your first personal computer.

Putting real computer power in the hands of the individual is already improving the way people work, think, learn, communicate and spend their leisure hours.

Computer literacy is fast becoming as fundamental a skill as reading or writing.

When we invented the first personal computer system, we estimated that over 140,000,000 people worldwide could justify the purchase of one, if only they understood its benefits.

Next year alone, we project that well over 1,000,000 will come to that understanding. Over the next decade, the growth of the personal computer will continue in logarithmic leaps.

We look forward to responsible competition in the massive effort to distribute this American technology to the world. And we appreciate the magnitude of your commitment.

Because what we are doing is increasing social capital by enhancing individual productivity.

Welcome to the task.

[IBM y Apple](#) han cerrado un acuerdo para introducir sus móviles y tabletas en el mundo de los negocios. Estos antiguos enemigos han firmado este acuerdo para hacer llegar a las empresas iPhones e iPads, que contarán con un gran número de aplicaciones desarrolladas de manera conjunta. De esta manera se conjugaran capacidades en el entorno corporativo, aportadas por IBM con la electrónica y la marca de Apple.

Queda ver cómo se toman esta alianza dos grandes marcas que también intentan posicionarse en el mercado de la empresa: Samsung y Microsoft.

¿Podrá este nuevo matrimonio superarlos?
